I RISE TO EVERY CHALLENGE.

ATHLETE

Nomex. **Kevlar.**

An unstoppable combination of strength and inherent flame resistance.

130 YEARS OF INNOVATION

Globe invented turnout gear 130 years ago. Today we still deliver the most advanced, best-fitting, and longest-lasting protection by listening to our customers, creating breakthrough designs, and applying the engineering skills of the nation's most trusted manufacturer.

Our owners, our employees, and our dealers all share a passion for building "Athletic Gear for Firefighters" in their choice of styles, materials, and options. And no matter what challenges tomorrow's firefighters face, they can be sure that Globe will continue to be there to protect them.

1887 Globe Manufacturing Company is founded in Lynn, MA. Courtland F.H. Freese buys the company and moves it to Pittsfield, NH, which remains its headquarters to this day.

1918 Globe receives a patent for a waterproof coat using an outer shell, a waterproof barrier, and a thermal lining—the same system still used today by all manufacturers of turnout gear.

1953 Globe is the first to use 3M™ Scotchlite™ reflective trim to add visibility to its turnout gear.

1966 Globe introduces DuPont NOMEX® inherently flame-resistant fabric.

1975 Globe is a charter member of the National Fire Protection Association, creating the first NFPA 1971 Standard for Protective Clothing for Structural Fire Fighting. Globe becomes the first to comply with this new standard for every turnout sold.

1985 Globe introduces two state-of-the-art performance fabrics: PBI® for outer shells and waterproof, breathable Gore-Tex® fabric for moisture barriers.

1991 Globe brings ergonomic design to turnout gear by launching the revolutionary GX-7™, which rapidly becomes the most popular turnout gear in the fire service.

1993 The fourth generation of the founding Freese family takes over the ownership and management of Globe. Gef (left), Rob (middle), and Don (right).

1994 Globe is the first manufacturer of turnouts to achieve ISO 9001 Certification.

1995 Globe acquires Cairns Protective Clothing.

2000 Recognizing that the rescue component of firefighters' jobs continues to grow, Globe introduces Globe LifeLine—the right gear for the job. Globe implements Lean Manufacturing, dramatically improving efficiency and reducing delivery times.

2003 Globe launches G-XTREME®—the world's most advanced turnout gear—designed to move the way the human body moves without restriction.

2005 REACTION® joins the Globe Cairns family, with its patented collar that attaches the liner to the outside of the jacket and adds length and fullness where the body bends.

2006 Globe introduces "Athletic Footwear for Firefighters," with its remarkably flexible, cushioned, and contoured construction, to choruses of "Wow."

2007 Globe launches IH™ Pants—integrating a Class 2 internal seat harness with floating, load-equalizing leg loops into turnout gear.

2008 Globe introduces G-XCEL® and RSX™ turnout gear styles—serious performance and great value.

2009 Another new Globe turnout style—CLASSIX®. Value-priced turnout gear with a nod to the traditional.

2012 G-XTREME® introduces a whole new dimension in fit—SHAPE. Now your gear can really fit your body—without extra bulk and without restriction—so that you can perform your job better.

2015 Globe introduces the evolution of Athletic Gear for Firefighters. The new G-XTREME® 3.0 is completely retailored from collar to cuff to provide even less restriction.

2016 Globe previews the future of turnout gear—ATHLETIX™. New material technology enables the all-new athletic design with stretch fabrics that allow closer, body-contoured fit to provide unprecedented range of motion with less bulk, more flexibility, and lighter weight.

2017 MSA acquires Globe Manufacturing Company to continue the Globe tradition of innovation.

A New Dimension in Fit: SHAPE

Available in G-XTREME® 3.0
and IH™ READY

RELAXED SHAPE

Many firefighters choose a relaxed shape for maximum mobility. That's one reason why our G-XTREME® 3.0 Pants are so popular—added length in the knee and the seat and added fullness in the seat and thigh give it a less-restrictive, relaxed shape.

REGULAR SHAPE

Those who are trimmer may appreciate this new, closer-fitting, regular shape with added length in the knee and the seat but with less fullness in the seat and thigh.

TAPERED SHAPE

An athletic, tapered shape fits firefighters with a larger chest and shoulders without adding bulk around the middle. Our most popular shape.

STRAIGHT SHAPE

Those with a broader build or who plan to wear a seat harness or other equipment around their waist under the jacket will appreciate the fuller, straight shape.
